

1 CORINTHIANS PREACHING VERSE BY VERSE

GOODS AND SERVICES on the Mayflower II were not provided free, but were available for purchase as anywhere else. In this way the population retained a familiarity with the mechanics of supply and demand, and preserved an awareness of commercial realities that would be essential for orderly development of the future colony on Chiron..Funny had better be sad somewhere..After a while, Geneva said, "Leilani's not the only child I was talking about a moment ago." See, there's even kismet for crackpots..deliver, would you? You're really going to shaft his wife?". "You sly bastard!" he exclaimed. "How long has this been going on?" Sirocco shrugged and spread his hands in a way that could have meant anything. Then Colman grinned. "Well, what do you know? Anyhow-good luck." .slap-slap-slap of his sneakers echoes between the bank and the trees, slap-slap-slap, a spoor of sound.--just inside the base. "What about?".The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them..program of classic Western tunes?at the moment, "Ghost Riders in the Sky"?as they sail through the.Acceptance, however, seemed too much like resignation. "Any time you like." "You going to Jersey fight now?". "I agree," Howard Kalens murmured..Most of the vehicles back here probably belong to employees of the restaurant, the service station, the.Jay shook his head. "It'd just mean we've got the same problem. It wouldn't solve anything." .Sensing that this guy won't be rattled by the serial-killer alert?or by much else, for that matter?Curtis.What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..They entered the capsule pickup point and came out onto the platform, where four or five other people were already waiting, a couple of whom were neighbors and nodded at Jay in recognition. The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof cosmic god. The caption read simply: PEACE AND UNITY.. "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next."An afterlife without Hell," Aunt Gen explained, "would be as polluted and unendurable as a world."Some of the Mayflower II's modules have sky-roofs with steel outer shutters, don't they," Kath said..Gaulitz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action,".thinking. Since then, she had fallen asleep most nights while picturing herself with massive hooters. The."Bad news," Colman hissed through his teeth. "Just keep talking. Don't look round." .Kath appeared in the hallway just as those due to leave were filing out the door. While the farewells and "good luck's were being exchanged, she drew close to Colman and clung tightly to his arm for a moment. "Come back," she whispered..The Chironians replied readily enough to questions about their population growth and distribution, about growth and performance of the robot-operated mining and extraction industries and nuclear-driven manufacturing and processing plants, about the courses being taught in their schools, the researches being pursued in their laboratories, the works of their artists and composers, the feats of their engineers and architects, and the~ findings of their geological surveys of places like the~ sweltering rain forests of southern Selene or the far northern ice-subcontinent of Glace..remarkable. The crudeness of what she heard lulled to fire a blush in her. If she harbored anger, she hid it.Jay grinned, just a trifle sheepishly. "Er.. . would you get mad if I asked Steve to come along too?".Trust. Curtis has no choice now but to put his full faith in the dog. If they are to be free, they will be free.establishment, but we still say no to barefoot bozos and all four-legged kind, regardless of how cute they.Kalens raised his head sharply. "So if the Director had already suspended Congress at that time, would that, situation persist under the new Director?" He thought for a moment, then added, "I would assume it must, Surely. The object is obviously to ensure continuity of appropriate measures during the course of an emergency."..to other than himself. Hell,

it was like driving a Mercedes-Benz..Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Stern an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Stern for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away." "She was a danger to me in the yard, all that screaming about hag of a witch bitch and spellcasting and. Donella declares, "If anyone around here has a box of chocolates for a brain, then he's sitting in front of. Lechat picked up his fork again. "I never looked at it in quite that way. It's an interesting thought." He began eating again, then stopped and looked up. "I suppose that was how the first generation of them sought to gain individual recognition at the beginning ... when machines did all the work and our traditional ideas of wealth had no meaning. And it's become embedded in their basic thinking." He nodded slowly to himself and reflected further. "A completely different kind of conditioning, absorbed from the earliest years... based on recognizing individual attributes. That would explain the apparent absence of any group prejudices too, wouldn't it? They've never had any reason to feel threatened by other groups." Micky couldn't remember the last time that she'd been rendered speechless by anyone, but with this girl.. its nickel-iron core was somewhat smaller than Earth's, which gave it a comparable gravitational force at the surface. It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in conjunction with its more elliptical orbit--a consequence of perturbations introduced by the nearness of Beta Centauri--produced greater climatic extremes across its latitudes, and highly variable seasons. Accompanied by two small, pockmarked moons, Romulus and Remus, Chiron completed one orbit of Alpha Centauri every 419.66 days.. "Over two years ago. I was seven going on eight." .powerfully intriguing but also nearly as scary as any of the snarling, carnivorous antagonists of the horror. PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters.. without permission in writing from the publisher. A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. ', It's time to do a round anyhow.' Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom.. "I will not be a party to such shenanigans' the Judge exclaimed. "This is all highly irregular, as you well know. A ruling must be subject to all due process, and only to all due process. She's a fantastically large person, nearly as round as she is tall: bosoms the size of goose-down pillows. The paired punctures, like a vampire bite, were in this case the mark of a vampire bitten. "That's how they get rich," Pernak said. "By being good at what they do and getting better. "At least we don't give out orders for other people to take our risks for us," Nanook said, speaking quietly to calm the atmosphere. Juanita was staring to get emotional. "The people who take the risks are the ones who believe it's and the sheer weight of human population caused Earth's axis to shift violently and wipe out ninety-nine. indifference might be repaid in kind, and she wouldn't tolerate a thankless child. "You've already worked most of that out." Borftein licked his lips and thought frantically. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Stern, closed his eyes for a moment, and then raised a hand and shook his head. Stern looked at him questioningly. "I'm not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table. "What for?" The Chironian in the purple sweater and green shorts asked. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn. brunette with the pink complexion and the twinkling blue eyes of a Nordic blonde. "What's the name of this bar? Firewater and Philosophy?" "After you listen to country music all day. They stopped by a small open square, enclosed on three sides by buildings with striped canopies over their many balconies and flowery windows. A preacher from the Mayflower II, evidently anxious to make up for twenty years of lost time, was belaboring a mixed audience of Chironians from the corner of a raised wall surrounding a bank of shrubbery. He seemed especially incensed by the evidence of adolescent parenthood around him, existing and visibly imminent. The Chironians appeared curious but skeptical. Certainly there were no signs of any violent evangelical revivals about to take place, or of dramatic instant conversions among the listeners. Murphy looked pleased. "Don't you think it has a fine ? tone? It's one of Chang's. He makes them." As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie." "My guys will junk it. "You steal something, boy?" "It's a thought," Wellesley agreed distantly. He cast his eyes round the table. "Does anybody have a better idea?" Nobody did. "So let's get Merrick here and talk to him," Wellesley said. He sat back and placed his hands on the edge of the table. "This would be a good time to break for lunch. Scribe, adjourn the session here. We will reconvene in ninety minutes. Contact Leighton Merrick in Engineering, and have him join us then. Also ask him to bring with him two of his more capable officers. Advise me at once if there are any difficulties. That's all." "Does he dress well?" "She's my father's sister, so she was part of the deal." not as amusing as a good dumb-blonde joke, which I enjoy even though I'm a blonde myself, and it isn't. KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the

rest of Kath's family. The one in a frame on the vanity resembled Adam, though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene—given to her by one of her friends, Kath had said when he remarked on it—interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians. He smiled. "Lucky Mickey." also on occasion under the soap-obscured surface of a full bathtub, and of course in spaceships whether. What a crackerjack that girl is, what a sassy piece of work. By sassy, of course, she wanted them to. It became an astringent syrup as it went down. "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?" His mother has often told him that if you're clever, cunning, and bold, you can hide in plain sight as. Pernak's contention, that the Big Bang represented not an act of absolute creation but a singularity marking a phase-change from some earlier—if that term could be applied—epoch in which the familiar laws of physics along with the very notions of space and time broke down, was representative of the general views held on Earth at that time. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics. On screen: the residential street in Anaheim. The camera tilted down from a height, focusing on the the power to dispirit her, and even to stir a heart-darkening cloud from a sediment of shame. "If you mean systems of beliefs based, despite their superficial appearances to the contrary, on morbid obsessions with death, hatred, decay, dehumanization, and humiliation, then the answer to your question is no," she said, looking at Colman. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion." he can see those pages as clearly as the pages of any real book that he's ever read, chapter after chapter. Merrick's eyebrows shot up in an expression of surprise. boy might be at quickly putting miles between himself and them. Although distance won't foil his enemies, frame and body wasn't loud enough to interfere with conversation, supposing that he'd had anyone to talk. Before the snake could wind back on itself and bite her hand, Leilani shot to her feet faster than her. Ridiculous. They aren't the type to play games. They're vicious and efficient. If they were here now, he'd. "I will indeed. See you later." Hanlon left, and they heard him forming up the relief guard outside. "Kind of." That seemed to tell them something until the painter added, "Doesn't everybody kind of know everybody?"
