He."It's a rare gift, to know where you need to be, before you've been to all the places you don't need to be. Well, send me a student now and then. Roke needs Gontish wizardry. Wizards trained at the school went to other islands of the Archipelago to work against warlords, pirates, and feuding nobles, preventing raids and forays, imposing penalties and settlements, enforcing boundaries, and protecting individuals, farms, towns, cities, and shipping, until social order was re-established. In the early years they were sent to enforce peace; increasingly they were called on to maintain it. "And maybe you'll be looking at my yearlings over in the Long Pond pastures, in the next day or so.". "Keep her quiet," said the young woman, and left him holding the mare's reins in this deserted place. She returned after some time lugging a heavy bucket, and set to sponging off the mare's leg. "Get the saddle off her," she said, and her tone held the unspoken, impatient, "you fool!" Ivory obeyed, half-annoyed by this crude giantess and half-intrigued. She did not put him in mind of a flowering tree at all, but she was in fact beautiful, in a large, fierce way. The mare submitted to her absolutely. When she said, "Move your foot!" the mare moved her foot. The woman wiped her down all over, put the saddle blanket back on her, and made sure she was standing in the sun. "She'll be all right," she said. "There's a gash, but if you'll wash it with warm salt water four or five times a day, it'll heal clean, I'm sorry." She said the last honestly, though grudgingly, as if she still wondered how he could have let his mare stand there to be assaulted, and she looked straight at him for the first time. But he isn't a wizard, only a king. So

others say the dark years will come again, when there was no rule of justice, and wizardry was used for evil ends." The name leaves say is change, change... Everything will change but them." He looked up into the trees. But Hopeful, sailed and steered by two young sorcerers from the Hand of Havnor, brought Medra safe. She could see his mind dance ahead of hers, taking up and playing with ideas, transforming them as he had transformed brick into butterfly. She could not dance with him, she could not play with him, but she watched him in wonder. She did not look back. South of Andanden lies a land where the ashes fell a hundred feet deep when last the volcano spoke. Rivers and streams cut their way seaward through that high plain, winding and pooling, spreading and wandering, making a marsh of it, a big, desolate, waterland with a far horizon, few trees, not many people. The ashy soil grows a rich, bright grass, and the people there keep cattle, fattening beef for the populous southern coast, letting the animals stray for miles across the plain, the rivers serving as fences. A wonder she was, and Dory bade fair to follow her. "No, nothing. Count me as a master again, if you will." As they were talking with her master a wagon drew up on the dock and began to unload six familiar halftun barrels. That's ours," Ivory said, and the ship's master said, "Bound for Hort Town," and Dragonfly said softly, "From Iria." She put her hand on his knee. It was the first time she had ever touched him.
