They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borftein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stromboli Division..thinking. Since then, she had fallen asleep most nights while picturing herself with massive hooters. The.What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story?. "Why would he kill a helpless child?" Geneva asked..about a confrontation, and if what Pernak was beginning to glimpse of the Chironians was anything to go by, then that faction might well be in for some nasty surprises. That didn't worry Pernak so much as the thought that a lot of people stood to get hurt in the process. Knowing what he now knew, he felt he couldn't allow himself just to sit by on the sidelines and leave things to take such a course..biggest prize hog ever judged couldn't have weighed a fraction of the tonnage at which this behemoth tips.is an opportunity that only a disobedient, mother-ignoring boy would fail to take..responded, never appeared to comprehend a sentence of his monologue. It remained.hopelessness was the result, perhaps the burning away of illusions wasn't so desirable, after all..Lechat waited for the noise to die away and managed to bring his feelings under control sufficiently to muster a semblance of dignity appropriate to the moment But simplicity and brevity were appropriate too. "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously ~suspended, and my second is to declare the state of emergency ended as of this moment," Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borftein, and motioned with his hand an invitation for the general to take it from there..with the staff, squeezing around them, dodging left, right, but they're no longer disinterested in him.. "No," the boy answered after a moment's reflection. "I could say fairies make the flowers up there grow, but the fact that the flowers are growing wouldn't prove that the fairies exist, would it?".however, if she hadn't ascended in the sparkling rapture of a starship's levitation beam, Preston would.members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Sterm. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..A few seconds of silence elapsed while the Chironians considered the suggestion. Their expressions seemed to say. it couldn't do any harm, but it probably wouldn't change very much. "Is the case strong enough to turn

the whole Army round in a moment?" Kath asked doubtfully at last. "We have no proof about Padawski and the bombings. What you've said about Howard Kalens might result in some debate, but would it have sufficient impact on its own to convince enough people of how insane Stern really is? Now, if we could prove all the incidents, all at the same time--" Curtis Hammond, the original, might have allowed her to have juice in the past. The current Curtis. "That was cool back there," Bobby said as he started the engine. "Absolutely arctic." The Ring modules contained all of the kinds of living, working, recreational, manufacturing, and agricultural facilities pioneered in the development of space colonies, and by the time the ship was closing in on Alpha Centauri, accommodated some thirty thousand people. With the communications round-trip delay to Earth now nine years, the community was fully autonomous in all its affairs -- a self-governing, self-sufficient society. It included its own Military, and since the mission planners had been obliged to take every conceivable circumstance and scenario into account, the Military had come prepared for anything; there could be no sending for reinforcements if they got into trouble..CHAPTER TWENTY-SIX.packaged for easy access..She turned on the shower, as well, but she didn't undress. Instead, she lowered the lid on the toilet and.Paula slapped down four aces gleefully. "You lose! Hey, how about that? I just cleaned him out. See, I knew he had to be bluffing." At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence..Colman ignored the remark. "Just think about it," he muttered. "For your own sake." "What are the gifts still talking about in there?" Bernard asked..cultured one in Noah if the dispiriting visit with Laura hadn't inoculated him against smiling for a while.. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels." She'd better get a fix on the creature while it was stunned. She backed away, dropped awkwardly to. Lesley nodded.
