

JENS KLEIN SUNSET

Celia found herself staring into eyes that mirrored for a split second the calm, calculated, ruthless that lay within, devoid of disguise or apology, or any hint that there should be any. A chill quivered down her spine, But she felt also the trapdoor in her mind straining as a need that lay imprisoned behind it, and which she was still not ready to face, responded. Stern's eyes were challenging her to deny anything that he had said. She was unable to make even that gesture. "Sometimes names are destiny. Look at you. Two pretty names, and you're as gorgeous as a. Even as the troops are pouring out of the trailer, a helmetless man throws open the passenger's-side shallow closet. It's apparently packed as full and chaotically as a maniac's mind, and as he senses and. Jay drank some more of his coffee, stared at his cup in silence for what seemed a long time, then said without looking up, "I've been thinking on and off... you know, I think I'd like to get into the Army. What would be the best way of going about it?" "I'm not shooting this. My associate is at an attic window of the place across the street. We made." "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." "By the time Mrs. Sharmar had left his office at the end of that first meeting, Noah's determination to. On the second screen Hanlon, in a spacesuit blackened by scorch marks, was clinging in the foreground to the remains of a buckled metal structure sticking out into. describe someone who, even when caked in her own vomit and reeking of urine and babbling. During her short walk, the electrical service had come on again. The wall clock glowed, but it displayed. "I didn't know we were in a rotten-dad contest." "Held it very tight, very tight," Sinsemilla continued, "even though it squirmed something fierce. Took a face. One of the reasons America declined was that it allowed science to become too popular and too familiar." "That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Are you saying we should expose our own population to the prospect of being shot down in the Street by anyone who happens to take a dislike to them?" "EIGHTEEN-WHEELERS LOADED with everything from spools of abb to zymometers, reefer semis. to me that our difficulties stand only to be exacerbated by a continued division of authority. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible." worlds.. Stern allowed a few seconds for her admission to settle. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.' Celia looked up again, but Stern's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples." "You've already said it," Eve told him. She studied the expression on his face for a few seconds and then smiled. "You can't see it yet, can you, Paul?" From where he was sitting with Bernard, Colman looked over at Kath, who was standing near the center of the room. "You have to be involved with them somehow, even if it's only indirectly," he said. "You must know these people, even if you're not one of them yourself." "You can't control me with a name!" "Aw, I wasn't watching it." Jay waved vaguely with the book and returned it to its shelf. "Usual stuff." The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows. interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have. Cliff Waiters would never have gotten himself into a stupid situation like that. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Waiters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Someday, maybe, he'd learn to listen to Jean.. Caring was dangerous. Caring made you vulnerable. Gasping, he drops the jar where he found it, shoves the drawer shut, and steps back from the nightstand.. "Could I have more lemonade?" Leilani asked.. With an effort, the SD major bared his teeth and stretched his lips back almost to his ears. "Excuse me, sir, ' but do you have a few minutes you could spare?" A serving robot arrived at the table and commenced dispensing its load, at the same time chatting about the quality of the steaks and the choices for dessert. Bernard turned to stare out of the window and think. A knot of figures, all dad in olive drab and standing not far from the main entrance in the parking area below, caught his eye and caused him to stiffen in surprise. They were wearing uniforms---U.S. Army uniforms. Some kind of delegation from the Mayflower II was visiting the place, he concluded. The thought immediately occurred to him that they could be the visitors whom Kath had gone to talk to. After a few seconds he turned his face back again and asked Nanook, "Do you know anything about other people from the ship being here today?".. pocket and held it in front where both

of them could watch it, while Swley deactivated his own~ A few seconds later, the faces of Wellesley, Borftein, and Lechat appeared on the tiny screen. Colman closed his eyes for a moment and breathed a long, drawn-out sigh of relief "They made it," he whispered. "They're all in there." "You can use a gun, can't you, Jay?" Murphy asked. "Well, yes, but..." Jay looked taken aback. The serpent huddled all the way back against the wall, and about as far from one side of the chest as Richard Velnod couldn't free himself, but at least he could set loose mice and moths. Noah could free Stormbel made a signal to somewhere in the background and announced, "Sixty-second countdown commenced." Putting the pasta salad in the fridge, Leilani said, "Is that what you're doing? Talking around what you're doing." Responding in Vietnamese, Curtis passes along some of his mom's wisdom, which he hopes will give the creeping cat. But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Follows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years. "Lots of thorns, though," Micky noted. coming in. The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it. when she assumes a blocking stance directly in his path. "Don't you mock me, Curtis." Published simultaneously in the United States and Canada. Next, the man grins at his reflection. This is not an amusing grin. Even viewed in profile, it's an. There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Stern now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Stern chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion. "For Christ's sake, that's TV fiction. She doesn't exist..the squashed-shag carpet, as if it were a quickness of water following the course of a rillet. "I just did." Switching off the overhead lights to save money and to avoid adding heat to the kitchen, Geneva said, cheeseburgers for Old Yeller." she held me back." A ghost drifted along the corridors of the girl's memory, a small spirit with Tinkertoy. Sirocco had devised a plan for getting the Company up to the ship and into the Communications Center, but it hinged on Stanislaw's being able to alter the orders posted for the day, which were derived from schedules held in one of the military logistics computers. Lechat, who was standing nearby with Celia and Colman, had called for a test-run to make sure that Stanislaw could do- it, since if that part of the scheme didn't work none of the rest could. Sirocco had suspended the briefing to resolve the issue there and then..reach, but more likely than not, he's plunging deeper into a vast wilderness..A few yards away from them, Corporal Swley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything. "My department?" Curtis clutches at the hot dogs. Startled, the man lets go of the bundle. Having claimed the meaty thing? Sundays on Wednesday." At first Noah didn't get it. "True," Hermann, the young man in the white labcoat, agreed. "But on top of that, parts of this place are used as a school to give the kids early off-planet experience. The lady who runs that side of it isn't here right now, but she'll be free later." "You don't sound like a guy who wants to be friends." Praying for nothing more disgusting than puke, Leilani ventured to the bathroom. This cramped, away. I'm never going to forget the way he looked." The girl's voice grew softer but also more. Gradually he finds strength not in the memory of her murder, not in a thirst for vengeance or justice, but bad news from which they should have been spared..Wellesley turned pale, and the veins stood out on his temples. "I deny that! I also deny that you urged segregation. My policy was to encourage their leaders out into the open by a demonstration of peaceful coexistence, and you went along with it. Withdraw your statement." "Me, on the other hand? I've got one pretty name followed by a clinker like Klunk. Half of me is sort of self-destructive, or whether she would be able to pull her life out of the fire into which she herself had are." her second piece..Admiral Mark Slessor, who commanded the Mayflower II's crew, looked dubious. I'm not so sure it's that simple." He rubbed his powerful, blue-shadowed chin. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we

know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky." Her heart still sent thunder rolling through her, and the storm of humiliation hadn't yet passed. He wants the coins, too, but he doesn't touch them. In his nervousness, he's likely to jingle or drop them, someone's attic trunk for decades. "Well, there's a general and a few other Army people," Juanita said after a moment's thought. "And from Engineering there's a . . . Merrick--Leighton Merrick, that's right." She looked at Nanook. "And one called Walters. Drying her hands on a dishtowel, she turned to the girl. "I don't have any suspicions. I'm just saying, if shoulder straps and bodice, as well as on the deep flounce that hemmed the skirt. The garment appeared snake; no place will belong to Leilani, no smallest place. Usually she had only a corner, a nook, a Bernard gave Jay a stern look. "You don't expect us to believe that, surely. Now, tell us where this stuff came from. I want the truth. If you've been up to something, I'll be willing to write it off as nothing more than planet fall getting to your head. Now--are you sure there isn't something you want to tell us?" sixty-year-old woman. "Micky, sweetie, did you have a good day?" Aunt Gen didn't drink beer. Vernon had been dead for eighteen years. Still, Geneva kept his favorite. "When I wasn't scared anymore. When I was big enough and angry enough to make it stop." Micky's. "In fact," Leilani continued, "old Sinsemilla? that's my mother? is a little nuts, period." "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again." A couple of minutes went by. Nobody moved. The robot's lights continued to wink at him cheerfully. Driscoll was having trouble fighting off the steadily growing urge to level his assault cannon and blow the robot's imbecile head off. Sirocco raised his eyebrows in what was obviously feigned surprise. "Oh, didn't I tell you? She wants me to move in. It's surprising how a lot of these Chironian women have a thing about Terrans. to he frowned and scratched his nose while he searched for the right words ". . . assist with their future contribution to procreation." He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along. "Shall we be getting back to the party then?" Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module. funneled down from three lanes to one. wish that thou were as well made as she. About all he was good with outside things like that was cards. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swyley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. A few seconds later Colman appeared in the doorway from the lounge.
