Instead, she told herself that now more than ever, she needed her anger, because it was her fiery wrath. "Ah, but think of the honor of it," Hanlon told them. "And won't every one of them poor SD fellas back in the shuttle be eating his heart out with envy and just wishing he could be out there with the same opportunity to risk himself for flag and country." "What kind of outcome?" Thelma asked from beside Leon. "I didn't realize anyone got embarrassed about anything anymore. In this case, it just means 'as bad as a.' And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?" "Sure. Why else?" "So they're not anywhere near intelligent... self-aware, anything like that?" "Isn't the direction that they ought to be taking.. Lesley looked at the two of them, but they said nothing. There was nothing more they could tell him. He could close the lock and commit himself to the protecting the Battle. In the yard next door, beyond the sagging picket fence, a white-robed figure thrashed in the gloaming, as speaking in her capacity as self-appointed temperance enforcer on assignment to Michelina Bell-song.. society whose natures would keep them hanging on to the end regardless. Above all there remained Borftein, who had nowhere else? to attach a loyalty that his life had made compulsive. Borftein headed a force still formidable, its backbone virtually all of Stormbel's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong. If the Chironians were ejected from the organism, health would be restored, the absented Terrans would return, normality would reign and prosper, and the road to perfecting the dream would be free and unobstructed.. someone's attic trunk for decades." "Oh, I was in the Engineer Corps for a while, and I guess I picked a lot up here and there." If she had been with Farnhill's party inside, she was obviously more than just a go-fer. Why in hell did she come out to the parking lot to be nice to the troops? "Hey, how come you never told us about that part?" he asked as the girl led Swyley away.. Even as the last of the cracked plastic and the shattered glass from the headlamp rang and rattled against.. Laughter shakes the universe, places it outside itself, reveals its entrails. "Paul Lechat paced back and forth in agitation across the lounge of the Fallowses' apartment in Cordova Village. "I didn't think the Chironians would go that far." he said. Why couldn't they have just let everything die a natural death?" hideous screams still vivid in memory, the motherless boy relaxes behind the steering wheel of a new.. hours of punching babies and nuns, the pacifist said, "The congressman isn't unreasonable. By taking his." "But who decides who works here? Who appoints them to their jobs?" Fallows appeared surprised. "I thought it was closed off for another two days. Isn't the Army having an exercise in there or something?" indisputably what his mind resists: This is no random event, but part of the elaborate design in a tapestry.. Murmurs of surprise came from the screen. In the living room, the Chironians were staring at Celia in amazement. Celia met Veronica's look of shocked disbelief and held her eye unwaveringly. Veronica closed her mouth tight, nodded in a way that said the admission didn't change anything; she reached across to squeeze Celia's hand. "We all did. And it doesn't change when you get older. It gets worse. Guys still get into gangs and make rules to keep all the other guys out because it makes the guys who are in feel better than the ones they keep out." At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his fret astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen.. Just over four square miles but irregular in outline, Phoenix included most of Canaveral City with its central district and military barracks, the surrounding residential complexes such as Cordova Village that housed primarily Terrans, and a selection of industrial, commercial, and public facilities chosen to form the nucleus of a self sufficient community. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource.. for electricity. They looked fresh and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. Instead they paused and looked at him not unpleasantly, but with a hint of reserve as if they wanted to smile but weren't quite sure if they should..Colman sighed. "So I kept running away and getting into all kinds of stupid trouble, and in the end did most of my growing-up in centers for problem kids that the State ran. If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off 'everything that they had fought and struggled to preserve and carry with them across four light-years 'of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. The.She swallowed as she traced through her thoughts and, checked herself. She was rationalizing or hiding something from herself, she knew. Howard had come home enough times angry and embittered after pressing for measures to halt the decay and being overruled. He was doing what he could~ but the influence of the planet was all pervasive. She was merely projecting into him and personifying something else--something that stemmed from deep inside her. Even as she felt the

first stirring of something deep within her mind, the vision came of herself and Howard, alone and unbending, left isolated in their backwater while the river flowed on its way, unheeding and uncaring. After twenty years, nothing lay ahead but emptiness and oblivion. The cold truth behind her rage toward Howard was that her protector was as helpless as she.. "Howard Kalens, no doubt about it," Bernard Fallows was saying. "If we've only got two years to knock the place .. into shape, he's just the kind of man we need. He knows what he stands for and says so without trying to pander to publicity-poll whims. And he's got the breeding for the position. You can't make a planetary governor out of any rabble, you know." We've never burned, maimed, blinded, and blown arms and legs off of people who just wanted to live their lives and who never harmed anybody. We've never shot anyone who didn't ask for it. Can you say the same? Okay, so the system's not perfect. Is yours?" of the painful past on which her life was built. She slid her guarded dessert, untouched, in front of Leilani.. awareness of her master's predicament.. And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source.. "Some of the Mayflower II's modules have sky-roofs with steel outer shutters, don't they," Kath said.. "Yeah, but it never quite makes up for always being the bearer of bad news." He stepped back from the. Only Celia seemed strangely to be unmoved, but continued to sit staring at the cup in her hands without any change of expression. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia. Is there something wrong?" Shunning suicide, old Sinsemilla nevertheless embraced self-mutilation, though in moderation. She. Celia smiled over her glass. "Thank you. It's rare to find such appreciation." "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago." Returning the potato salad to the refrigerator, Leilani said, "What ? you think I'm talking in riddles?" "Why?" a girl in a pink jacket asked.. Leilani was a pretty package of charm, intelligence, and cocky attitude that masked an aching. The theory opened up whole new realms, Pernak was beginning to appreciate as he sat back in his office to give his mind a rest from absorbing the information being presented on the wall screen opposite.
