They do not appear to care that they have interfered with Humankind's grandest endeavor. But when two weeks had gone by and there was still no word from the Board of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have. The examiner, a wizened, white-haired fuddy-duddy whose name Barry instantly forgot, had been hostile and aggressive right from the word go, telling Barry that he thought his handshake was too sincere. He directed the conversation first to the possible dangers of excessive sunbathing, which was surely an oblique criticism of Barry's end-of-August tan and the leisure such a tan implied, then started in on the likelihood that dolphins were as intelligent as people. Barry, having entered the cubicle resolved to stake all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer and, two, he had no interest in animals except as meat This started the examiner off on the psychic experiences of some woman he'd read about in Reader's Digest. Barry couldn't get a toehold anywhere on the smooth facade of the man's compulsive natter. He got the feeling..hesitation stretches much longer in my head than it does in realtime. So much passion, Rob. . . . It seems.She raised her feet so a group of three gawking women from the ship could get by. They were letting them come through in groups of five every hour. They didn't dare open the outer egress more often than that, and Lang was wondering if it was too often. The place was crowded, and the kids were nervous. But better to have the crew sat-."Are you indeed?" asked Lea, smiling. "A piece of die mirror I am trapped in lies at the bottom of this pool. The images bloom and expire, ten every second: the tracer is following each queen back to the egg, men the egg to the queen that laid it, then that queen to the egg. Tens of thousands of generations have passed; in two thousand hours, beginning with a Paleocene bee, he has traveled back into the Cretaceous. He stops at intervals to follow the bee in real time, then accelerates again. The hive is growing smaller, more primitive.
