person again. Never. The real Leilani was back?rested, refreshed, ready to take care of business.. "Really--you just walk in and help yourself. That's how they do things here... for everything." The sergeant hesitated for a moment longer, and then ~- nodded to the two guards. Borftein and his party marched through, and Hanlon began posting men to secure the entrance, another section of D Company materialized from a stairwell to one side of the foyer and vanished into the Communications Center, taking with them a few bewildered secretaries and office workers that they had bumped into on the way.. "But she sure does give the man major class and respectability. Now you go out there and do the right. Bernard felt the color rising at the back of his neck. The pathos that she was trying to project was touching a raw nerve. He refilled his glass with a slow, deliberate movement while he brought his feelings under control. "What makes you so sure I found it all that wonderful?" he asked. "Aren't you assuming the same right to tell me what I ought to want?" He put the bottle down on the table with a thud and looked up. "Well, I didn't think it was so wonderful, and I don't want any more of it. Today I told Merrick to stuff his lob up his ass..freedom..Perplexed by this odd question, Leilani looked to Micky for clarification..for Leilani, and perhaps none for Micky herself..Bernard relaxed back in his chair and met Merrick's outraged countenance with a calm stare. "Nobody's going to shut that complex down, and you know it," he said. "Save the propaganda. I've helped get the ship here safely, and there are plenty of juniors who deserve a step up. I've done my job. I'm quitting..". "We get them," Nanook agreed. "But not a lot. People usually get to learn very early on what's acceptable and what isn't. He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along..Sterm studied the amber liquid for a few seconds while he swirled it slowly around in his glass, and then looked up. Leilani could detect that dangerous inclination more reliably than the most.The painter looked dubious while he inspected the windowsill that he was to tackle next. "That doesn't make much sense," he murmured after a while. "Why would somebody stay poor if he didn't have to? That'd be a strange. kind of way to carry on..".He's at too great a distance for those beams to expose him. And in the absence of a moon, although he.Hanlon shook his head. "Ah, why be vindictive? "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules..".Merrick allowed his hands to drop down to his chest. "And how are you settling in? Is your family adjusting well?..".The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. then went on in a more distant voice, "But it's still not really the same. "I'm saying it's very likely. What triggers a phase-change. Earth?." "Worth considering for what? You're not saying he'd make an engineering officer, surely." "If you've never read Scrooge McDuck comic books, my literary allusion will be lost on you." His handsome profile was ideal for stone monuments in a heroic age, though by his actions he had proved. Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. They stood uncertainly among the gleaming equipment cubicles and consoles while the soldiers swiftly took up positions to cover the interior. Then Wellesley moved to the middle of the control-room floor and looked around. "Who is in charge here?" he demanded. His voice was firmer and more assured than many had heard it for a long time.
