"I See You" is the first new Damon Knight story in many years; it was the feature story in FASF's special Damon Knight issue (November 1976). As might be expected, it is a totally fresh piece of work and it shines with quality. Damon says of it: "You may think it is a short story, but it is really a novel on the plan of A for Anything and Hell's Pavement, only much compressed. i. "My dear sir, it is out of consideration for you that I have exposed you only to our lighter forms of entertainment I presume you are referring to something in the nature of a Music Hall, or Vaudeville. I assure you that, since the advent of Universal Education, even the popular taste has become too refined to tolerate the foolishness of sentimental songs and lurid melodrama. Also, please do not use again the expression you have just uttered. I mean the one beginning with the letter D. Our twentieth-century society has grown unaccustomed to language of such violence. "You've heard of the long-period Martian seasonal theories? Well, part of it is more than a theory. The combination of the Martian polar inclination, the precessional cycle, and the eccentricity of the orbit produces seasons that are about twelve thousand years long. We're in the middle of winter, though we landed in the nominal 'summer/ It's been theorized that if there were any Martian life it would have adapted to these longer cycles. This machine has dials and little windows with numbers in them, and switches and pushbuttons, most of which you don't understand, but you know they are for special purposes and don't matter. The main control is a metal rod, right in front of you, with a gray plastic knob on the top. The knob is dull from years of handling; it feels warm and a little greasy in your hand. The console has a funny electric smell, but the big screen, taller than you are, is silent and dark. You can feel your heart beating against your breastbone. You grip the knob harder, push it forward just a little. The screen lights, and you are drifting across the next room as if on huge silent wheels, chairs and end tables turning into reddish silhouettes that shrink, twist and disappear as you pass through them, and for a moment you feel dizzy because when you notice the red numbers jumping in the console to your left, it is as if the whole house were passing massively and vertiginously through itself; then you are floating out the window with the same slow and steady motion, on across the sunlit pasture where two saddle horses stand with their heads up, sniffing the wind; then a stubbled field, dropping away; and now, below you, the co-op road shines like a silver-gray stream. You press the knob down to get closer, and drop with a giddy swoop; now you are rushing along the road, overtaking and passing a yellow truck, turning the knob to steer. At first you blunder into the dark trees on either side, and once the earth surges up over you in a chaos of writhing red shapes, but now you are learning, and you soar down past the crossroads, up the farther hill, and now, now you are on the big road, flying eastward, passing all the cars, rushing toward the great world where you long to be..Smith hears the woman shriek. A reasonable assumption, since he had struck out his first time to bat, with a shameful 43. But when two weeks had gone by and there was still no word from the Board of Examiners, he wondered if maybe he'd managed to squeak through. He didn't see how he could have. The examiner, a wizened, white-haired fuddy-duddy whose name Barry instantly forgot, had been hostile and aggressive right from the word go, telling Barry that he thought his handshake was too sincere. He directed the conversation first to the possible dangers of excessive sunbathing, which was surely an oblique criticism of Barry's end-of-August tan and the leisure such a tan implied, then started in on the likelihood that dolphins were as intelligent as people. Barry, having entered the cubicle resolved to stake all his chips on a tactic of complete candor, had said, one, he was too young to worry about skin cancer and, two, he had no interest in animals except as meat

This started the examiner off on the psychic experiences of some woman he'd read about in Reader's Digest. Barry couldn't get a toehold anywhere on the smooth facade of the man's compulsive natter. He got the feeling, "I'm no swimmer but I prefer hot water to ice," Amanda said..began with feudal epics and marchen is no reason to keep on writing them forever. And daydreams.Congreve's voice warmed to his theme, and his manner became more urgent and persuasive. "Developments in genetic engineering and embryology make it possible to store human genetic information in electronic form in the' ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship'~ computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected.'.buried in this frozen shard of ice. Many readers are, in fact, unacquainted with the general canon of English literature or the standards of criticism outside our own small field. Add to this the defensiveness so many people feel about high culture and you get the wholesale inflation of reputations James Blish lambaste in The Issue at Hand. Like him, I believe that somebody has to stop handing out stars and kisses: If "great writer" means Charles Dickens or Virginia Woolf (not to mention William Shakespeare), then it does not mean C. S. Lewis or J. R. R. Tolkien, about whom the most generous consensus of mainstream critical opinion is that they are good, interesting, minor authors. And so on..He certainly had a right to say that, but there was no self-pity, just an observation. Then he looked at me with slightly distressed eyes.
