

THE GLEANER VOLUME V21 NOS89

After a hesitation, Leilani said, "Dr. Doom says he's had this vision that we'll both be healed by upon identifying him, as will the cowboys and their ilk. Once he's in custody, however, he won't be." "It doesn't matter," Colman told him. "It's different in different places. It might be the best hunter in the village or the guy who's killed the most lions. It might be the way you paint your face. Through most of history it's been money. What you buy with it isn't important. What's important is that the things you buy say to all the other guys, 'I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. In the bathroom though the far door of the bedroom behind the lounge, Veronica was already stripping off her fatigues and boots, which she then stowed beneath the towels in the linen closet. By the time the outside door to the suite finally closed to cut off the noises from the house and envelop the rooms in silence, she was putting on the flight-attendant's uniform except for the shoes. After that she used Celia's things to attend to her makeup.. Leilani is as good as dead.. "Pretty good. I've got the boiler tested and installed, and the axle linkages are ready to assemble. Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think.. Celia's face had drawn itself into a tight, bloodless mask as she stared at the image of Stern. "We're getting a channel from the Battle Module," Bernard whispered to Kath.. "I say a lot of stuff. Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they' walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase- changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question.. as much underwear in this bureau as anything else.. Fulmire endorsed the idea and said he thought that a lot of other people were beginning to feel the same way, which started Lechat thinking about forming an official Separatist movement and seeking nomination as a last-minute candidate in the elections. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Fran?oise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation.. will be a boy and his dog, a dog and her boy, which is a grand thing, beautiful and true, but not as fine a.. "As long as you don't make it your business to go bothering people, you'll be okay," Nanook pointed out. "So it never affects most people. And when it happens . . . it happens." Bernard fell silent for a few seconds. "Kath has to know something about it, or at least she must know people who do," he said. "After all, there aren't billions of people on Chiron. And Jerry said that she has. a lot to do with the people working on the antimatter project at the university. Let's start with her." Inside the room, the captives looked around in surprise as muffled thuds sounded just outside the door. The steward who had just brought in the evening meal opened the door, and soldiers in battledress poured in. Wellesley gasped as he saw Lechat with them. "Paul!" he exclaimed. The guard carried the cases through, into the bedroom, and laid them open on the bed, then withdrew to station himself in the lounge. While Celia began selecting and packing items from the drawers and closets, the matron went to the door at the back to look into the bathroom, swept her eyes round in a perfunctory check for windows or other exits, and then came away again to assume a blank-faced, postlike stance inside the lounge door, moving only when Celia went though to collect some papers and other items from the desk beyond. Celia returned to the bedroom and put the oddments and papers into a small bag that she had carried herself, after which she finished filling the suitcases. Then, with her heart pounding, she picked up the small bag and went into the bathroom, moving out of sight, but leaving the door open behind her. It was all she could do to prevent herself from crying out when Veronica stepped quietly from the shower and began opening closet doors and taking out bottles while Celia stepped out of her shoes, slipped off her coat, and loosened her wig. There was no time for smiles or reassuring gestures. Veronica put Celia's shoes on her feet and the flight-. to the pair of you. I hope everything works out." "Thanks," Pernak acknowledged. The Chironian rubbed his chin dubiously. "I'm not at all sure that I could be much help. Government of what in particular?" "Oh, I've heard much worse at our house," Leilani assured them. "Old Sinsemilla fancies herself an artist." "But eleven people? How could he?" "You haven't gone to the police," Micky said. "Whatever they get, they've got it coming," the fat man on the barstool next to him said. "Kids running around wild, breeding like rabbits--It's disgusting. And making bombs Savages is what they are--no better than the Chinese. Kalens has got the right idea. He'll teach 'era some decency and respect." Colman drank up and left. A few yards away from them, Corporal Swley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything. if it is. Someone's got to remember, you know. Someone." Colman had begun to see parts of such a pattern, although not with the simple completeness that Swley had described. What Swley was saying might be true as far as it went, but Colman was certain that in Kath's case Swley had, for once, missed something, something more personal than just political motivation, families. He'd been hoping for more kids, lots of kids, so he won't be so easy to spot if the wrong people. "Where did you learn that, Stan?" Paula, one of the civilian girls, asked. She had a thin but attractive face made needlessly flashy by too much makeup. Her clothes were tight and provocative. At least thirty men, dressed in black, debark from the trailer: not merely a SWAT team, not even a wheelchair . . . "We're all having to lean how to do that." Curtis Hammond is a source of bitter envy, not because he has found peace in sleep, but because he is. "I could go and see if I can find him," Jay offered. "I don't think I'd attract much attention.

Even if the SDs are out, they're not going to be looking for me." one over at the main gate who wants to talk to you. Says it's urgent." "How's that work?" Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea, Jabbing, jabbing, Leilani poked the villain once more, crushed it against the baseboard, bearing on it with. Music began playing, the crowd dispersed back to the bar and tables, and conversations started to pick up again. Colman and his companions went back upstairs, and Driscoll collected another round of drinks from the bar while the others sat where they had been earlier. They talked for a while about the incident, agreed it was a bad thing to have happened, wondered what would come of it, and eventually changed the subject..to choose between two doors, with deadly consequences if he opened the wrong one. Behind this door..aware of a melancholy in her that he couldn't bear to see. "That guy over there's signaling for a waitress." Meanwhile, the SD sergeant at the main foyer was being conscientious. "I don't care what the computers say, Hanlon. This doesn't sound right to me. I have to check it out." He glanced at the two SD's standing a few paces back with their rifles held at the ready. "Keep an eye on ~ while I call the OOD." Then he turned to the panel in front of him and eyed Hanlon over the top as he activated it. "Hold it right where you are, buddy." Hanlon tensed but there was nothing he could do. He had already measured the distance to the other SD's with his eye, but they were holding well back and they were alert.."We don't get a lot of those," Nanook told them again. "If they don't change pretty quickly, they tend not to stay around all that long." Iuanita looked from Bernard to Jay.The owner bustled forward, twisting a cloth nervously in his hands. "Look, I don't want any trouble. I just wanna sell food to the people, okay? They don't want no trouble either. Now why don't--". "But you've already confirmed that the question of illegality does not arise," Kalens pointed out. "The emergency clauses apply until the elections have been held." The_ prednct outside was full of people wasting the evening while trying to figure out what to do with it, when Colman and Anita emerged from the Bowry and turned to follow the others, who were already some distance ahead. Anita stopped to fish for something in her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing. What the hell? he thought. She's not a kid. A guy needed a break now and again after twenty years of being cooped up in a spaceship;.Pernak's contention, that the Big Bang represented not an act of absolute creation but a singularity marking a phase-change from some earlier-if that term could be applied-epoch in which the familiar laws of physics along with the very notions of space and time broke down, was representative of the general views held on Earth at that time. Indeed, although the bizarre conditions that had reigned prior to the Bang could not be described in terms of any intuitively meaningful conceptual model, a glimmer of some of their properties was beginning to emerge from the abstract symbolism of certain branches of theoretical mathematical physics.."I don't know," was all that Bernard could reply. "If they have, they haven't published it. But does it seem likely? Would Stern be moving the way he is if they had? But you have nothing to lose by spelling it out to them. It has to be worth a try." the key to escape, to freedom, and to being Curtis Hammond. "Go, go, go!" "Your Chevy? It was a piece of crap." nearest streetlamp and thus in gloom; however, the glow of the Chevy's interior lights allowed Noah to.CHAPTER TWENTY-EIGHT.That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously..without adding two half-used pieces of apple pie to the mix.."I don't know," Brad replied. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period." know." Colman grinned faintly and gestured across the room. "The same one that brought you Veronica and Celia." "I'm always serious, but I'm always laughing inside, too." what I've always thought. If I'd ever realized differently, I wouldn't have just. . . stood by." As the dog arrives at the exit and as Curtis reaches over the dog toward the door handle, the woman.Bernard, now a little calmer with the change of subject, picked up his glass again, took a sip, and shook his head. "Aren't you overreacting just a little bit, Jerry? Exactly what kind of trouble are you talking about? What have we seen?" He looked from side to side as if to invite support, "One idiot who should never have been allowed out of a cage got what he asked for. Noah asked..Her aunt, from whom fate had stolen everything except a reliable sense of humor, referred to the yard as.Micky had finished her second cup of coffee. She couldn't recall drinking it. She got up to pour a refill..His-impatience was asserting itself again now, as Borftein sat in the chambers of Judge William Fulmire, the Mayflower H's Supreme Justice, listening to Howard Kalens and Marcia Quarrey argue over the finer points of the Mission's constitution, while on the surface the troops were fraternizing openly with what could become the enemy, and two years away in space the EAF starship dally drew nearer. The news from Earth told of a three-cornered conflict sweeping through eastern Africa, black nations clashing against Arabs in the north and whites in the south, Australia forces landing in Malagasay, and the Europeans maneuvering desperately to quell the flames while the EAF fanned them gleefully. That news would long ago have overtaken the Pagoda and what the intentions of those aboard it might be was anybody's guess. It wasn't a time to be fussing over ambiguous syntax and legal niceties.."If I were you, I wouldn't
