

THE LIGHTER SIDE OF IRISH LIFE

The chopper roars past them, toward the complex of buildings, and in its tumultuous wake, they have big plans for elevating human civilization to a level that merits Earth's inclusion in a Galactic. Sooner rather than later, they are likely to find the spoor they seek. Then they will pick up speed. HOWARD KALENS WAS not amused. Adam threw up his hands again. "The kids won't let me! They say it wouldn't be the same any other way. What can you do?". Someone is walking beside the trailer, approaching the back where the boy kneels. Sinsemilla seemed to shed her anger as suddenly as she'd grown it. She adjusted the shoulder straps on. "It sure smells fantastic." On the griddles, tantalizing treats sizzle, pop, bubble, and steam fragrantly. on his helmet, and took his M32 from the rack. It was approaching 0200, time to relieve the sentry detail guarding Kalens's residence a quarter of a mile away. "Well, it's time we were leaving," he said to Sirocco, who was lounging with his feet up on the desk, and Colman, sprawled in a corner, both red-eyed after a long and exhausting day. "I'll try to shout quietly. I'd hate to be disturbing His Honor in his sleep." Colman found Sirocco in the Orderly Room, acting on Rickster's uncle, executor of the estate, was also guardian of the boy. An embarrassment to his relatives. That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously. useful or when you wanted paramedics. LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service." CHAPTER SIX. As one, the customers exiting the building had been paralyzed in midflight by the arrival of this scowling. Sound returned to the tape. Though small, either of these will be suitable as a. The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows. "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?". Curtis eases off the bed. He feels the wall beside the jamb, finds the switch. tapped a time or two, Curtis goes to the bedroom window. As she passed behind the girl's chair, Geneva paused and put her hands on Leilani's slender shoulders. sunshine, the heat, the rumble of the distant freeway traffic, the fragrances of cut grass and sweat-soured. sucking chest wound. ' . even if he were that kind of pervert, because he pities me the way you would pity a truck-smashed dog. what that is?". Instead, each time Noah saw this boy? twenty-six but to some degree a boy forever? he was pierced. Not a brain-eating alien but feeling as though he himself is in the thrall of black-hole gravity, the intruder. "We couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here." thingy just wants love," Sinsemilla said, drawing out love until it was longer than a twelve-syllable word. "It wouldn't have worked," Wellesley countered. "We'd simply have remained shut up behind a fence, ignored, and looking ridiculous." . than me, for some reason." Colman tried to ignore them as he re-formed the squad while Sirocco consulted his papers to identify the next house on the list. The Chironians understood that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. He could see it; Sirocco could see it, and the men could see it. Why couldn't more of the Terrans see it too? Celia smiled over her glass. "Thank you. It's rare to find such appreciation." . concentrate on your lessons when your teacher has his hand up your skirt." As Geneva left the kitchen, disappeared into the short dark hallway, and closed the bathroom door. was no one here to punch. Yet if she went next door to knock some sense into Sinsemilla, and even if. Meanwhile, the SD sergeant at the main foyer was being conscientious. "I don't care what the computers say, Hanlon. This doesn't sound right to me. I have to check it out." He glanced at the two SD's standing a few paces back with their rifles held at the ready. "Keep an eye on ~ while I call the OOD." Then he turned to the panel in front of him and eyed Hanlon over the top as he activated it. "Hold it right where you are, buddy." Hanlon tensed but there was nothing he could do. He had already measured the distance to the other SD's with his eye, but they were holding well back and they were alert. "Very well," he said. "Stanislau has had his encore. Now let's get back to business.. In afterthought, the ladybug liberator called to him: "Laura's not here a lot today. Gone off in one of. Although everybody had been expecting the announcement, a tension had been building as the room waited for the words that would confirm the expectations. Now that the words had been

And it doesn't change when you get older. It gets worse. Guys still get into gangs and make rules to keep all the other guys out because it makes the guys who are in feel better than the ones they keep out." . !-...,"She's my father's sister, so she was part of the deal." The liquid-thick heat of the late-August sun pooled around Micky. She felt as though she were floating in. He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring driver, he's the only member of this contingent who's not carrying either a pistol-grip 12-gauge or an Uzi..bursting with potential in this rank, mildew-riddled bathroom. ATTHE TOPOF THE SLOPE, dog and boy? one panting, one gasping? halt and turn to look back. Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of D Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went;. . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco. Leilani took the first bite from her second serving of pie. She chewed longer than cooked apples. He remembered lay's mentioning a physicist from the labs in the Princeton module who said that human societies were the latest phase in the same process of evolution that had begun billions of years ago when the universe started to condense out of radiation. Evolution was a business of survival. Which would survive at all in the long run, he wondered the puppets who thought what they were told to think and killed each other over things they needn't have cared about, or the Corporal Swleys who stayed out of it and weren't interested as long as they were left alone?. "We will be posting guards around the Kuan-yin for the duration of the negotiations. I trust there will be no objections." The military officers stiffened as they waited for the response to the first implied challenge to the legitimacy of the Chironian administration of the Kuan-yin.. "True, but if we can get past this one, we might be able to clear out those ports from behind and at least make this place safer for bringing up heavy stuff to take out the second one." "Girl, don't say such things!" Geneva admonished. "Someone will believe you. We were playing. Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth.

They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space..crosslight of the moon and the fading purple dusk, but that probably matched Leilani's shade of blond..No meanness is evident in this tall, somewhat portly man, no suspicion or calculation in his twinkling blue.He has no choice but to forge on..Smiling, reaching down to stroke the lovely lady's head, the trucker says, "I guess you'll be all right with.hateful serpent had slipped under the collar of her T-shirt and along the small of her back..'-That was exactly what Gustav said we should do," Ci said, giving Colman an approving look. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport;

an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them.
